New Patient Comprehensive Exam

"Before we leave let's find out where we're going"

Consists of:

- Full Series of X-Rays
- Bacterial Swab – determines your susceptibility to tooth decay
- Clinical Photographs
- Diagnostic Models of your teeth
- Blood Pressure Screening
- Oral Cancer Screening
- Full Dental Examination and Risk Assessment with the Dentist
- Organisation of your treatment options
- Consultation to review the options with you (this is often at another appointment after the Dentist has been able to review the above information)

This will take 90 minutes.

Cost:

This is the necessary information we need to help you choose the best course of treatment.
